

**Job Postion:** Groundcare/small tools engineer

**Hours:** 8am – 4:30pm (half an hour lunch) 8 hrs per day

Part time or Full time subject to candidate, flexible working available to correct candidate

overtime flat rate.

**Pay:** £12.50 -£16 per hour subject to experience and candidate.

**Job Description:**

Primarily supporting our growing customer base working on equipment used in the ground care sector. The job entails diagnosing, repairing and servicing small tools such as strimmers, chainsaws blowers and equipment, the candidate will have to be open to modern machines using battery power. Candidate will also work on self propelled walk behind mowers and ride ons.

Depending on expiriernce the option is available for candidate to extend their working to larger machines used in the commercial groundcare sector such as cylinder mowers, rotary mowers and flail mowers.

The job is customer facing with candidate expected to liase with customers on all aspects from booking to machine complete as well as information on machine faults.

The initial offering is workshop based however in time subject to experience and business demands this may switch to a multirole of mobile and fixed.

Completeing jobs in a timely manor, to a high standard and completing all necessary paperwork whilst communicating with other members to ensure consistent flow of work is a must.

Working independantly to manage and control workflow and minimise downtime is required along with meeting often tight and difficult time schedules during busy periods to exceed customer expectations.
